

Umwandlung von Brüchen Übungen

Wandle den unechten Bruch in einen gemischten Bruch um:

$$\frac{19}{7} = \square \frac{\square}{\square}$$

$$\frac{25}{4} = \square \frac{\square}{\square}$$

$$\frac{15}{4} = \square \frac{\square}{\square}$$

$$\frac{45}{11} = \square \frac{\square}{\square}$$

$$\frac{49}{12} = \square \frac{\square}{\square}$$

$$\frac{30}{8} = \square \frac{\square}{\square}$$

$$\frac{49}{8} = \square \frac{\square}{\square}$$

$$\frac{38}{8} = \square \frac{\square}{\square}$$

$$\frac{38}{10} = \square \frac{\square}{\square}$$

$$\frac{7}{5} = \square \frac{\square}{\square}$$

$$\frac{22}{3} = \square \frac{\square}{\square}$$

$$\frac{29}{8} = \square \frac{\square}{\square}$$

$$\frac{27}{11} = \square \frac{\square}{\square}$$

$$\frac{32}{10} = \square \frac{\square}{\square}$$

$$\frac{28}{10} = \square \frac{\square}{\square}$$

$$\frac{16}{12} = \square \frac{\square}{\square}$$

$$\frac{39}{6} = \square \frac{\square}{\square}$$

$$\frac{50}{6} = \square \frac{\square}{\square}$$

$$\frac{26}{11} = \square \frac{\square}{\square}$$

$$\frac{50}{8} = \square \frac{\square}{\square}$$

$$\frac{16}{7} = \square \frac{\square}{\square}$$

$$\frac{37}{8} = \square \frac{\square}{\square}$$

$$\frac{4}{3} = \square \frac{\square}{\square}$$

$$\frac{24}{7} = \square \frac{\square}{\square}$$

Wandle den unechten Bruch in einen gemischten Bruch um:

$$\frac{19}{7} = 2 \frac{5}{7}$$

$$\frac{25}{4} = 6 \frac{1}{4}$$

$$\frac{15}{4} = 3 \frac{3}{4}$$

$$\frac{45}{11} = 4 \frac{1}{11}$$

$$\frac{49}{12} = 4 \frac{1}{12}$$

$$\frac{30}{8} = 3 \frac{6}{8}$$

$$\frac{49}{8} = 6 \frac{1}{8}$$

$$\frac{38}{8} = 4 \frac{6}{8}$$

$$\frac{38}{10} = 3 \frac{8}{10}$$

$$\frac{7}{5} = 1 \frac{2}{5}$$

$$\frac{22}{3} = 7 \frac{1}{3}$$

$$\frac{29}{8} = 3 \frac{5}{8}$$

$$\frac{27}{11} = 2 \frac{5}{11}$$

$$\frac{32}{10} = 3 \frac{2}{10}$$

$$\frac{28}{10} = 2 \frac{8}{10}$$

$$\frac{16}{12} = 1 \frac{4}{12}$$

$$\frac{39}{6} = 6 \frac{3}{6}$$

$$\frac{50}{6} = 8 \frac{2}{6}$$

$$\frac{26}{11} = 2 \frac{4}{11}$$

$$\frac{50}{8} = 6 \frac{2}{8}$$

$$\frac{16}{7} = 2 \frac{2}{7}$$

$$\frac{37}{8} = 4 \frac{5}{8}$$

$$\frac{4}{3} = 1 \frac{1}{3}$$

$$\frac{24}{7} = 3 \frac{3}{7}$$
